Type: ROUTINE INSPECTION

Date: Feb-23-2010

SOLDIER, KS 66540

No non-compliant items found on this inspection.

This was a focused inspection on the non-compliant item found during inspection on 18 February 2010. See below.

2.40 ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care

A female Wheaton Terrier (Microchip # 089382321) was observed to have wounds consistent with fighting (puncture wound on the left front leg, right front shoulder/neck and top of the head). The licensee stated that the dog was moved earlier that morning to a pen with a male and a fight ensued. The female was separated from the male. At the time of inspection the licensee had examined the dog and determined that no treatment was necessary, but had yet to document that the dog received adequate veterinary care. The licensee must be able provide documentation of veterinary care. The licensee must develop a system to ensure that documentation of adequate veterinary care is maintained at all times.

To be corrected from this date forward.

23 February 2010

The female Wheaton Terrier (Microchip # 089382321) and documentation pertaining to her veterinary care were observed during this focused inspection. The dog appeared to have no lingering effects from the fight wounds and the licensee was able to provide documentation that the dog received adequate veterinary care.

This focused inspection was conducted with the licensee and Natalie R Cooper, VMO.

2.126 (a) (1)

ACCESS AND INSPECTION OF RECORDS AND PROPERTY.

(a) Each dealer, exhibitor, intermediate handler, or carrier, shall, during business hours, allow APHIS officials: (1) To enter its place of business.

This is the first attempted inspection.

On September 1, 2009 between 11:35 and 11:45 am, the licensee failed to have a responsible person available to conduct an animal welfare inspection. The inspector knocked on the door, called the phone number on file, and honked the vehicle's horn.

If your hours of availability have changed, please contact me at 240-461-9284 and leave a message.

Type: ROUTINE INSPECTION
Date: Sep-29-2008

2.50 (b) (1)

TIME AND METHOD OF IDENTIFICATION.

b) A class "B" dealer shall identify all live dogs and cats under his or her control or on his or her premises as follows: (1) When live dogs or cats are held, purchased, or otherwise acquired, they shall be immediately identified: (i) By affixing to the animal's neck an official tag as set forth in Sec. 2.51 by means of a collar made of material generally acceptable to pet owners as a means of identifying their pet dogs or cats \3\; or \3\ See footnote 2 in Sec. 2.50(a)(1). (ii) By a distinctive and legible tattoo marking approved by the Administrator.

At least 11 dogs that were greater than 4 months old were observed with no official identification. All adult dogs must be identified by wearing a tag containing the required information (USDA, 48-B-0070, & dog number) affixed to a collar, a tattoo, or a microchip in order to facilitate the required recordkeeping and ensure that the identity of the animal is maintained. The licensee must ensure that all adult animals possess official identification at all times.

TO BE CORRECTED BY: October 6, 2008

2.130

MINIMUM AGE REQUIREMENTS.

No dog or cat shall be delivered by any person to any carrier or intermediate handler for transportation, in commerce, or shall be transported in commerce by any person, except to a registered research facility, unless such dog or cat is at least eight (8) weeks of age and has been weaned.

APHIS FORM 7006s, Record of Disposition of Dogs and Cats, were examined. One of these forms identified that the licensee transported in commerce animals that were less than 8 weeks of age:

Five American Eskimo dogs, born on July 31, 2008, were transported in commerce on September 24, 2008. These dogs should not have been transported until September 25.

Two Dachshunds, born on August 2, 2008, were transported in commerce on September 24, 2008. These dogs should not have been transported until September 27.

Inspection Report

Animals must not be transported in commerce until at least 8 weeks of age and weaned in order to protect their health and well-being. The licensee must ensure that all animals transported in commerce are at least 8 weeks of age.

TO BE CORRECTED IMMEDIATELY

3.6 (a) (2) (i)

PRIMARY ENCLOSURES.

(a) General requirements.

(2) Primary enclosures must be constructed and maintained so that they:

(i) Have no sharp points or edges that could injure the dogs and cats;

The ceiling in an enclosure housing 5 dogs in the "new far" building was constructed of "chicken wire" like mesh that had been chewed and pulled to the extent that many sharp points were directed down into the enclosure. These sharp points could injure the animals. The licensee must repair the aforementioned hazard. The licensee must develop a program of monitoring and maintenance to ensure that all enclosures are kept free from sharp points and edges at all times.

TO BE CORRECTED BY: October 1, 2008

3.9 (b)

REPEAT

FEEDING.

(b) Food receptacles must be used for dogs and cats, must be readily accessible to all dogs and cats, and must be located so as to minimize contamination by excreta and pests, and be protected from rain and snow. Feeding pans must either be made of a durable material that can be easily cleaned and sanitized or be disposable. If the food receptacles are not disposable, they must be kept clean and must be sanitized in accordance with Sec. 3.11(b) of this subpart. Sanitization is achieved by using one of the methods described in Sec. 3.11(b)(3) of this subpart. If the food receptacles are disposable, they must be discarded after one use. Self-feeders may be used for the feeding of dry food. If self-feeders are used, they must be kept clean and must be sanitized in accordance with Sec. 3.11(b) of this subpart. Measures must be taken to ensure that there is no molding, deterioration, and caking of feed.

At least 29 self feeders were observed that had an excessive accumulation of dirt, grime, and/or food residue or that were rusted to the point that the surface was pitted, rough, and could no longer be effectively cleaned and sanitized. Food receptacles must be easily cleaned and sanitized and must be kept cleaned and sanitized to prevent feed contamination and protect the health of the animals. The licensee must ensure that all food receptacles are kept clean and sanitized. The licensee must develop a program of monitoring and maintenance to ensure that all food receptacles are kept in good repair and are kept cleaned and sanitized as required by the regulations.

This is a repeat non-compliant item. It was also not in compliance on June 1, 2007.
